

# The new Yale Series N.

**Could save you up to €3000\* on fuel costs.**

The new Series N, designed by Yale engineers to be the most cost effective forklift truck to run in it's class.

## **DELIVERING MORE PRODUCTIVITY**

- All-round view of load when lifting to high levels - means less risk of damage
- Economical to run with high fuel efficiency
- Ergonomically designed position of controls and steering column, adjustable armrest and seat
- Reliable and robust design with 4,000 hour / 24 month warranty
- Comprehensive driver assistance systems available

**The Series N - can be configured to meet the demands of the most extreme of applications whilst still providing operator comfort.**

**Full colour touch screen display with integrated technology**

Offers modern functionality and quick, easy access to vital truck information; integrated technology ties together telemetry functionality, rear facing camera and load weight indicator available amongst other features.

**Ergonomically designed operator cab**

Adjustable armrest and steering column can be set in a number of positions to suit the optimum height for the operator. Adjustable full suspension seat with 40mm forward and backward adjustment. Clear view overhead guard with wiper and cab heater available.

**Powerful LED lights**

Powerful LED work lights are fitted to the front of the truck and a single light is located to the rear of the truck to illuminate dark areas and to assist the operators view of the load and any obstacles that might cause damage.

**Rear grab handle with horn**

Helps reduce body strain and excessive twisting when reversing and alerts pedestrians.

**Easy three point access**

Large step, grab handle and flip up armrest allows the operator to easily access the cab.

Powertrain protection system with engine shutdown helps to protect engine and reduces downtime and service callouts.

**Dealer details**
