

# Small-E

- innovative inspection device custom-made and certified to be used on the Leonardo HD lift
- detachable accessory with a total net weight of only 32 kg (70 lbs).
- telescopic design, so that it can be returned into position when not in use.
- top control box can be moved to the extra deck, so that the operator can comfortably drive the MEWP into position while on the Small-E
- all the main features of the Leonardo HD remain available
